

What is claimed is:

1. A combination liner and shrink wrap packaging comprising a liner wrapped around a plurality of packages and shrink wrapped around said combination of liner and packages, said liner including at least three panels separated by fold lines at corners, the height of said liner at said corners being the same or different, the height of said panels at a point intermediate said corners being less than 90% of the height at any of said corners.
2. The combination liner and shrink wrap packaging of claim 1 wherein the height of said panel at the intermediate point is less than 90% of the height at any of said corners.
3. The combination liner and shrink wrap packaging of claim 2 wherein the height of the liner is less than 90% of the height of any of said corners for at least 60% of the rectilinear distance between two of said corners.
4. The combination liner and shrink wrap packaging of claim 1 wherein said liner includes at least four transverse fold lines forming corners.
5. A nestable liner blank comprising at least three panels separated by at least two transverse fold lines, the height of at least one said panels at a point intermediate said fold lines being less than 90% of the height at any said fold line, said liner having a top and a bottom, at least at one of said fold lines, one of said top and bottom being accommodated in a space between the height of the liner at one of said fold lines and the height of the panel at least one of said points wherein the height of said panel is less than 90% that of the fold line.

C6601(C)

6. A combination liner and package comprising a liner wrapped around a plurality of packages, said liner including at least three panels separated by fold lines at corners, the height of said liner at said corners being the same or different, the height of said panels at a point intermediate said corners being less than 90% of the height at any of said corners.
